Title: Atmosphere Engineering Signs Marketing Agreement with Praxair

Atmosphere Engineering and Praxair are pleased to announce the formation of a joint marketing alliance. The joint marketing alliance will offer each company additional channels into the thermal process industry via Atmosphere Engineering's gas control panels, Praxair's nitrogen based atmospheres and technology. "We believe that our customers will benefit by more complete product and technical solutions in today's increasingly data driven heat treat operations" says Praxair.

Praxair is the largest industrial gas company in North and South America with 2007 sales over \$9 billion. Praxair has been a supplier to the thermal processing industry since the early 1980's with the development of nitrogen / methanol technology and continuing with technology today that enables our customers to hold better process control through better furnace atmosphere control.
